

THAILAND OF INVESTMENT

Think Asia, Invest Thailand

WHY THAILAND?

Thailand, the second largest economy in south East Asia, has rapidly become one of the world's fastest growing and attractive markets. In the World Bank's Ease of Doing Business Report 2009 Thailand was ranked 12th, of 183 economies, in terms of Ease of Doing Business, Protecting Investors and Trading Across Borders.

Thailand provides major commercial opportunities for UK businesses. It is a pro-British market, ranking highly as an important market for outward trade and investment. Two-way trade between the UK and Thailand exceeded £3 billion in 2008. The UK is always among the top three European investors in Thailand with well in excess of £1 billion invested. Major UK investors in Thailand include Boots and Tesco, Standard Chartered, GlaxoSmithKline and British Gas.

Most UK companies trading and investing in Thailand however are small and medium sized companies such as Triumph Motorcycles, whose UK operation has remained in place but whose Thai manufacturing presence has facilitated increased global sales/market share. Indeed, many small and medium sized companies have established representative offices in Thailand or have invested in joint venture partnerships over the past decade to capitalise on the opportunities in the market. Small and medium sized companies look to Thailand due to its competitive start up and labour costs, good infrastructure, and its strategic location at the heart of Asia. It serves as a gateway to Southeast Asia and the Greater Mekong sub-region, where newly emerging markets offer great business potential.
